

Edmentum's EducationCity is excited to now offer single sign-on (SSO) to Google Classroom and Microsoft Office 365 for Education!

What is single sign-on?

Single sign-on or SSO allows users who are logged in with their Google Classroom or Microsoft Office 365 for Education login to sign into EducationCity without having to remember an additional username and password.

How does my school get started?

Talk to your IT or technical department about Google Classroom or Microsoft Office 365 for Education. You will need to use one of these partners before you can get started.

There is no cost to utilize this service, but we will need to assist you in the initial setup. The process to activate SSO may take a few days. To begin, reach out to our Customer Support team at educationcitysupport@edmentum.com or 800.995.5410 (Option 3).

What's next?

Our Customer Support team will provide a how-to document with next steps. Once the SSO option is activated for your account, you will need to edit each of your users in EducationCity by adding their email address to their user record in Manage Users.
